

## Learning Tasteful Gamification from Guitar

### Description

In today's blog, I've recorded a video ?

I'm merging my two passions, gamification and guitar! Guitarists often have effects pedals. These change the sound of the guitar, adding enhancements like echo, distortion, swooshing swirly stuff and more – much like how we use game-like elements to enhance an experience. And, just like gamification, when you add effects to your guitar tone, you need to be tasteful, contextual and often subtle!

Enjoy the over worked analogy and let me know what you think ?

Oh and of course – don't forget to jump in the comments, smash the like button and subscribe for more!
