

Episodes 8 & 9 of The Andrzej & Roman Show – Music & NFTs

Description

It's been a while, but here are two new episodes of the Andrzej & Roman Show.

In Episode 8 Roman surprised me with a discussion about a YouTube video I did called “Learning tasteful gamification from guitar effects”

We talk about what it all means and how it can be a useful metaphor. Check the episode here.

Episode 9 covers a topic that I have been dreading, NFTs! Roman does his best to convince me they are not evil – does he manage??

Enjoy and let us know what you want to hear next!
