

Hey there you lovely people.

I've decided to release a downloadable version of my Gamification Inspiration Cards as I know that the printed ones can get expensive and take ages.

The downloadable version includes an 8 to an A4 page formatted set of the cards as well as all of the cards as individual PNG files (52 cards).

Now, as this essentially does me out of repeat purchases of lots of cards for people's workshops, the price is a little higher than I would normally do, well I say high, the same as buying a single deck of the printed cards (without postage!!) **£9.99**

Enough chatter, here is the link to get your copy now!

Oh, it is worth noting, this has a few new cards compared to the physical deck - I will update the physical deck soon!
